

# Action Learning Sets

## Introduction

A key position in new PCN networks, the role of the Clinical Director and PCN Members will require support to ensure success and delivery of outcomes. Miad can support these positions by facilitating project team meetings and offering support as part of experiential learning. Individual members will be asked to assess their competencies as part of the programme with clear individual and team development plans

**Action Learning Sets** are a structured method enabling small groups to address complicated issues by meeting regularly and working collectively. This process is especially geared to **learning** and personal development at professional and managerial levels.

Work with our experienced facilitators in these structured project planning sessions. Create a peer support network with colleagues (and potential stakeholders) whilst establishing key leadership and development skills as a project team.

Using & implementing new primary care roles

Data & information to aid clinical decisions

Establishing & developing a team

Establishing & nurturing trust

Understanding key relationships
