

# Clinical Supervision Webinar – covering the Professional Development Standards 1,2,3,4 and 7

**12** external CPD points including the e-learning

## Introduction

This 4 hour on line webinar is essential training for any physician stepping into the role of the clinical supervisor. It covers the key responsibilities of the role and provides a theoretical basis for different learning styles and generational differences. In addition, it provides practical guidance to give feedback to trainees, especially during and after COVID 19. The webinar itself is interactive using discussion, video clips and skills practise to convey the information. There is also additional e-learning to supplement the learning.

## Course Structure

- **2 e-learning modules: Educational and Clinical Supervision and WPBA**
- **4 hour webinar**

## Webinar Objectives

- Background to the current state of medical education
- Role of the Clinical supervisor
- Learning styles – and Generational differences – how trainees differ and how best to support them
- Managing the trainee in difficulty – effective tactics to support them
- Providing feedback to trainees to guide their development
- Sources of support available
- Demonstrate what is meant by reflective practice as a medical practitioner in the context of clinical practice
- Apply the principles of reflection, enabling you to document your learning for inclusion into your portfolio as supporting information for revalidation

Delegates are expected to commit to being present for the whole session with video and microphone capability. If there are technical issues then use of the chat box will be the minimum requirement.

Our webinars are designed to be as engaging and interactive as possible, and delegates will therefore be required to be able to communicate with both the facilitator and their peers and be able to take part in group discussions and scenarios. CPD certificates will not be issued where there is no evidence of participation.
