

## Quality Improvement – Live Webinar [Foundation 1 and 2]

**3** external CPD points

### Introduction

This webinar is linked to the Foundation Curriculum 2021: programme Curriculum 2021 HL02 – A valuable member of the healthcare workforce – [Quality Improvement – 9].

The new webinar provides an overview of the key messages of Quality Improvement (QI) methodology, vital to the development of healthcare and patient safety. Based on the AoMRC document, 'Training for Better Outcomes: Developing QI into Practice' (June 2019) it provides an understanding of the elements required to identify areas for QI. Through theory and group work participants build knowledge of how to use data to support QI, recognise the challenge of implementing sustainable change that is auditable and the value of team working for QI and patient and staff safety.

There are opportunities to share experience and test out skills during the session.

### Course Structure

- **3 hour webinar**

### Webinar Objectives

- Clinical Governance and Quality Improvement Framework
- Use of data when identifying areas for Quality Improvement
- Human elements of change
- Implementing change
- Measurement of change
- Leadership and team working
